

Summary TEST EC4.8 & AW180 on fairaudio 4/2010 (germany)

“Geklotzt”

The Electrocompaniet EC4.8 and AW180 are a strongly combination in two aspects. On one hand they are very powerful and stable, on the other hand the sound of the combination is also on a very high level.

I was very impressed from the “integrated” way of reproducing music without concentration on one frequency domain. They are sounding very dynamic with a perfect timing. Also the soundstage is very stereoscopic and realistic.

This combination procures the music in an absolute natural way and this makes these amps to “All-rounder’s” on a very high standard.

We choose the AW180 as our new working equipment (Reference)!
