

## Summary TEST AW400 in hifi&records 2/2010 (germany)

### “Lost in music”

The Electrocompaniet AW400 leaves nothing to be desired, sound wise they collect the stars from heaven for each Music lover.

I seldom lost in music so many times when starting with an article. Exclusive for that, the Electrocompaniets are due to a special place on my Reference-list.

With its wide, open, clear and smooth floating sound they bring us without making a long way round into the heart of the music.

I have never heard before this perfect combination of fidelity and emotion.
